

Get  
more confidence  
in your smile

Your smile says more about you than any other physical feature. It is the first thing other people notice. Imagine the difference a whiter smile could make for you.

Tooth whitening can drastically improve the appearance of your smile, but with so many whitening options available, how do you choose the right one?

Start by asking your dentist about Opalescence, the leader in tooth whitening. Professional-strength Opalescence whitening treatments provide beautiful, long-lasting results. Safe and effective, Opalescence products contain PF, which helps prevent cavities, reduce tooth sensitivity and improve the overall health of your enamel.<sup>1</sup>

Because Opalescence tooth whitening treatments are so powerful and effective, they are only available through your dentist.

Opalescence® | **BOOST**

1. Data on file.

### **Whiten your smile.**

In today's world of instant gratification, no one wants to wait to make a great impression. For a brighter, whiter smile in about an hour, choose Opalescence Boost.

### **It's advanced.**

Chemically activated Opalescence Boost requires no light for whitening, saving you from the bothersome heat and ultraviolet rays of a light or laser.

### **It's immediate.**

The in-office Opalescence Boost procedure offers a brighter, whiter smile after just one hour. After your in-office procedure follow-up with additional whitening treatments at home to ensure your teeth reach their whitest potential. Opalescence provides a follow-up kit to use at home for a few days after your in-office procedure, as your teeth continue to whiten and eventually stabilize.

### **Keep your smile bright.**

After you've whitened your teeth, keep your smile looking great by practicing good oral hygiene and brushing your teeth after consuming food or beverages that could stain them. Opalescence Whitening Toothpaste is an easy way to help maintain your bright smile, because in addition to whitening your teeth, it offers a higher fluoride uptake than grocery store toothpaste. Ask your dentist about Opalescence Whitening Toothpaste, and keep your healthy, bright, white smile looking great.
